Rawhide by John McDonald is designed to make your work easier and your farm, ranch or livestock production business more efficient. They are an excellent alternative to hauling cattle home to process — you can work on site by yourself without lifting! In 2002, John McDonald invented and designed the first ever hydraulic portable corral on wheels with multiple pens and a 200 head capacity. Since then, we have expanded to multiple corral options and additional features including an increased capacity.
